

# Fluorescent Lights Recycling

Fluorescent bulbs contain toxic mercury residue and should be handled with utmost care.

CFLs (compact fluorescents) can be taken to [your nearest Home Depot store](#). Recycling bins are normally located near the entrance. Ask at the customer service desk.

Fluorescent Tubes from households should be taken to a local [Household Hazardous Waste \(HHW\) program](#) or disposed of through a [mail-in program](#). Businesses should also contact HHW programs or seek out mail in programs.

PLEASE DO NOT PLACE IN YOUR TRASH OR RECYCLING
